TestPro Announces Industrial Automation Business Unit

Huntsville, AL -- TestPro Systems Inc, a leading supplier of electronic test and measurement solutions, announced today the formation of a new business unit to expand their presence within the industrial automation and control market.

"The new business unit will be strategically focused on developing solutions for industrial test and measurement, automation and process control applications" stated Richard Wagner, president of TestPro Systems Inc. "TestPro Systems will usher in the new industrial revolution by providing solutions that will bridge process control systems with information systems to monitor, control and profit from actionable data."

Wagner furthered that "developing industrial automation and control solutions is nothing new for TestPro, we have been doing these kinds of projects for most of our 17 year history. The goal of the new business unit will be to sharpen our focus on this rapidly growing market segment."

For more information about this announcement or about TestPro Systems, Inc. please contact Jim Bell, Manager of Business Development at 256-705-5563 or by email at jbelle@testprosystems.com.
